Prior to the week of July 23rd you should build up your running to the point where you feel comfortable running a 2 mile long run. You should also be comfortable running a total of three days a week.

During the training program be sure to take off at least one day a week from exercising. You can cross train for 30-40 minutes two to three days a week, if you like.

Key to schedule:

- Easy: run at an easy pace
- Tempo: run at race tempo pace
- Long: run at a pace at least one-two minutes a mile slower than your intended race pace
- Rest / XT: rest or cross train
